

Important Notice

Thank you for installing *SectorHUD*.

For this software to work as intended with ETS2 or ATS, you'll need the *Funbit Telemetry Server* and plugin.

You can find it at <https://github.com/funbit/ets2-telemetry-server>.

Follow the instructions on that page to download the server software, install it and start the server to activate the plugin.

Now launch SectorHUD and select *Help / Instructions* from the menu to learn how to configure this software, set up the mod/sector database and use the overlay.
